MATERIAL SAFETY DATA SHEET (MSDS)

Product Name Synonyms	e : :	ORAFON R-22 HCFC-22, Refrigerant Gas (R22)		
Supplier Address	:	ORANOSS CO., LTD. 89 Moo 12, Soi Raikhing 42, Phu Sampran, Nakhonpathom 73210	tthamonthon Sai 5 Road., Tambol Raikhing Thailand	, Ampur
Emergency Pl	hone :	Tel : +66 (0) 2105 0499 (Auto)	Fax : +66 (0) 2105 0490	
2. HAZARDS IDE	ENTIFICATION			
Eyes:	Eye contact wit	h liquid may include eye irritation with	n discomfort, tearing, or blurring of vision.	
Skin:	Skin contact wi the skin.	ith liquid can cause frostbite. Prolong	ed overexposure may cause de-fatting or	dryness
Inhalation:	unconsciousnes		s harmful and may cause heart irre iberate in halation may cause death withon neavier than air.	
		es may lead to temporary alteration inadequate circulation. Gross exposur	of the heart's electrical activity with irreg	gular pul
	Individuals with		nervous of cardiovascular system may have	e increas
		include temporary nervous systems usion, incordination and loss of consci	depression, with anesthetic effects such as iousness.	s dizzine

MATERIAL SAFETY DATA SHEET (MSDS)

Fish point: Will not them Auto-ignition Temperature: 632 C (1170 F) Other materials may cause R22 to have weakly. Rever, this materials have been reported within findicated cambasitistity of R22 in pressure of certain concentrations of disvalume %, al. Eptimetrial data have been reported within findicated cambasitistity of R22 in pressure of certain concentrations of disvalume %, al. Extinguishing Media: Lise extinguishing media appropriate to summoning file conditors. Extinguishing Media: Lise extinguishing media appropriate to summoning file conditors. File Fighting Instructions: Lise water grays or fog to conducting: Safeguards (Personnel): Review frie fighting measures and handling (personnel) sections before proceeding with client up. Use appropriate personal protects encoursent during clean up. Use appropriate personal protective encoursent during clean up. Use approprise to power during cl		Flammable Properties:	Upper, Flammable Limits in Air (% by volume): Not applicable Lower, Flammable Limits in Air (% by volume): Not applicable
Auto-ignition Temperature: 63 °C (1170 °F) Other materials may cause R22 to hum wookly. However, this material has been shown in test to be combustible at pressure as low as 60 paig at ambient temperature when mised with air concentration of divinem % and. Experimental data have been reported which inclused combustibility of R22 in pressure of certain concentrations of divinem % and. Experimental data have been reported which inclused combustibility of R22 in pressure of certain concentrations of divinem % and. Experimental data have been reported which inclused combustibility of R22 in pressure of certain concentrations of divinem % and. Experimental data have been reported which inclused combustibility of R22 in pressure of certain concentrations of divinem % and properties to surrounding file conditions. Extinguishing Media Use water graps or fog to call containers. Self-contained beetshing approache to surrounding file conditions. Weter nurdi should be contained and neutralized prior to release. Self-contained beetshing approache surgeristic befores proceeding with clean proceeding file prove open finanes. Use self-contained breathing approache surgeristic befores proceeding releases. 2. HANDLING AND STORAGE Handling (Personnel): Acid breathing vapours. Avoid load onthe with eyes and sin. Use stifficient ventilation to lease strong optical and on the atabove 52 °C (125 °F). Storage: Xee throughene presonal protect with skin or eyes. Use with sufficient ventilaton to leagen and shandling (approach shando		Flash point:	
Other materials may cause R22 to burn weakly. R22 is not formmable at ambient temperatures and atmospheric pressure. Meeser, this material has been strown within indexta due combustible of pressure as low as 60 psig at ambient bemperature when mixed within indexta due combustible of R22 in pressure of certain concentrations of choine. Extinguishing Media: C. Winders may napture under fire conditions. Decomposition may occur. Extinguishing Media: De endiguishing media appropriate to summunding fire conditions. Decomposition pressure of the conditions. Decomposition pressure of conditions. Ref Bything Instructions: De endiguishing media appropriate to summunding fire conditions. Sufficient Release Measures: Review fire fighting measures and headining (personnel) sections before proceeding with conditions. Recidential Release Measures: Review fire fighting measures and headining (personnel) sections before proceeding with conditions. Recidential Release Measures: Review fire fighting measures and heading (personnel) sections before proceeding with conditions are appearable (SCBA) for large spills or releases. 7. HANDLING AND STORAGE Meeser the conditions are appearable pressure. Handing (Personnel): Active previous dyous and when choine or obser strong oxiding apparatus (SCBA) for large spills or eleases diversity represented with and concentrations of are above failed with choine or obser strong oxiding apparatus (SCBA) for large spills din atwoepsile pressure. <tr< th=""><th></th><th>Auto-ignition Temperature:</th><th>632 °C (1170 °F)</th></tr<>		Auto-ignition Temperature:	632 °C (1170 °F)
Safeguards (Personnel): Review fire fighting measures and handling (personnel) sections before proceeding with clean up. Use appropriate personal protective equipment during clean up. Accidental Release Measures: Ventilate area, especially low or enclosed places where heavy vapours might collect. Remove open fames. Use self-conflained breathing apparatus (SCBA) for large splits or releases. A. HANDLING AND STORAGE Avoid breathing vapors. Avoid liquid contact with eyes and skin. Use sufficient ventilation for keep employee exposure below recommended limits. R22 should not be mised with air for leak testing. In general it should not be allowed to for material to be present with high concentrations of air above atmospheric pressure. Contact with choine or other strong oxidizing agents should also be avoided. Storage: Keep in a clean, dry area. Do not heat above 52 °C (125 °F). Bersonal Protective Equipment: Impervious gloves should be used to avoid protection is required when using the product. Self-contained breating vapors, no registratory networking developed or repeated exposure. Londer in low or enclosed places. Personal Protective Equipment: Impervious gloves should be used to avoid protoged or repeate exposure. Chemical manufacturing conditions, no registratory networking its product. Self-contained breating apparatus (SCBA) is required if arge release occurs. Under formal manufacturing conditions, no respiratory protection is required when using this product. Self-contained breating apparatus (SCBA) is required if arge release occurs. Dependence Chorodifluoromethan (Cettry, Colourless liquid and vapour (SCHA) or grained if arge release occ		R22 is not flammable at ambient te However, this material has been sl mixed with air at concentration of 6 Experimental data have been report Unusual Fire and Explosion Haz Extinguishing Media:	 emperatures and atmospheric pressure. hown in test to be combustible at pressure as low as 60 psig at ambient temperature when 55 volume % air. ted which indicated combustibility of R22 in pressure of certain concentrations of chlorine. zards: Cylinders may rupture under fire conditions. Decomposition may occur. Use extinguishing media appropriate to surrounding fire conditions. Use water spray or fog to cool containers. Self-contained breathing apparatus (SCBA) is required if cylinders rupture or contents are released under fire conditions.
Accidental Release Measures: Clearn up. Use appropriate personal protective equipment during clean up. Accidental Release Measures: Ventilate area, especially low or enclosed places where heavy vapours might collect. Reverse open finames. Use self-contained breathing apparatus (SCBA) for large spills or releases. 7. HANDLING AND STORAGE Avoid breathing vapors. Avoid liquid contact with eyes and skin. Use sufficient ventilation to keep employee exposure below recommended limits. R22 should not be mixed with air for leak testing. In general it should not be allowed to for material to be present with high concentrations of air above atmospheric pressure. Contact with chlorine or other strong oxidizing agents should also be avoided. Storage: Keep in a clean, dry area. Do not heat above 52°C (125 °F). 8. EXPOSURE CONTROLS/PERSONAL PROTECTION Engineering Controls: Avoid breathing vapours. Avoid located with skin or eyes. Use with sufficient ventilation to keep employee exposure below recommended to prevent eye contact. Under on enclosed places. Personal Protective Equipment: Impervious gloves should be used to avoid prolonged or repeated exposure. Chemical contact. Self-contained breathing apparatus (SCBA) is required if large release cours. Exposures Guidelines: Chlorodifluoromethane ACGHI (TLY) 1000 ppm 3540 mg/m3 Och contained breathing apparatus (SCBA) is required if all regime release cours. None Established 9. PHYSICAL AND CHEMICAL PROPERTIES Appearance Clear, Colourites	6.	ACCIDENTAL RELEASE MEASU	RES
Remove open filames. Use self-contained breathing apparatus (SCBA) for large spills or releases. 7. HANDLING AND STORAGE Handling (Personnel): Avoid breathing vapors. Avoid liquid contact with eyes and skin. Use sufficient ventilation to keep employee exposure below recommended limits. R22 should not be mixed with air for leak testing. In general it should not be allowed to for material to be present with high concentrations of air above atmospheric pressure. Contact with chlorine or other strong oxidizing agents should also be avoided. Storage: Keep in a clean, dry area. Do not heat above 52°C (125°F). Bergineering Controls: Avoid breathing vapours. Avoid contact with skin or eyes. Use with sufficient ventilation to the age employee exposure below recommended exposure limit. Local exhaust should be used if large amounts are released. Mechanical ventilation should be used in low or enclosed places. Personal Protective Equipment: Imperious gloves should be available for use as needed to prevert eye contact. Under normal manufacturing conditions, no respiratory protection is required when using this noreal manufacturing conditions, no respiratory protection is required when using this more should be creating apparatus (SCBA) is required if large release eccurs. Exposures Guidelines: Chlorodifluoromethane ACGH (TLY) 1000 ppm 3540 mg/m3 Odor Slightly ethereal pH Neutral 40.8° C(+11.4° F) @ 760 mmHg		Safeguards (Personnel):

MATERIAL SAFETY DATA SHEET (MSDS)

-160 °C (-256 °F) **Freezing Point** Vapour Pressure 151.4 psia @ 25 °C (77 °F) Saturated Vapour Density 2.92 @ 25 °C (77 °F) (Air=1) **Specific Gravity** 1.19 @ 25 °C (77 °F) (H₂O=1) DRAFON Solubility in Water Slight Molecular Weight 86.47 **10. STABILITY AND REACTIVITY** This material is chemically stable under specific conditions, storage shipment and/or use. **Chemical Stability:** However avoid open flames and high temperatures. Incompatibility with Incompatible with alkali or alkaline earth metals powdered Al, Zn. Be, etc other materials: Decomposition: This material can be decomposed in high temperatures (open flames, glowing metal surfaces, etc) thus, forming hydrochloric and hydrofluoric acids, and possibly carbonyl halides. These materials are toxic and irritating. Contact should be avoided. **Polymerization:** Will not occur 11. TOXICOLOGICAL INFORMATION Single exposure (acute) studies indicate: Inhalation Practically non-toxic (2 hr-LD50 = 300000 ppm (rat), 390000 ppm (mouse) Rat 10 min-EC50 = 140,000 ppm (CNS Effects) Inhalation **Eye Irritation** Slightly irritating to rabbits (5-30 sec. Expose to gas spray) (Moderate) irritating to rabbits (liquefied gas with patch applied) Skin Irritation There have been several accidental deaths associated with exposure to this material or mixtures with other fluorocarbons. Death was generally attributed to oxygen deficiency. Microscopic examination of the tissues of some of the victims showed effects on the lungs and fatty deposits in liver cells. An increased in the incidence of heart palpitations has been claimed by individuals occupationally exposed. Monitoring of workers during occupational exposure showed no connection to exposure and cardiac arrhythmia or neurologic disorders. Other epidemiological studies have reported similar results. Repeated daily application of a 10 second spray caused reddening and slight swelling of the skin and a delay in hair growth. Skin allergy was not observed in guinea pigs following repeated exposure. Inhalation causes an initial stimulation and ten depression of the central nervous system (CNS). Symptoms in animals include loss of equilibrium, tremors, convulsion and narcosis and death, usually attributed to asphyxiation. At levels that caused anesthesia, dogs exhibited convulsions. Exposure by in halation at 300,000 to 400,000ppm for 10-15 minutes was fatal to rabbits, also causing hemorrhages and effects on the liver. Following inhalation exposure to 50,000 ppm for 1 month, no effects were reported in guinea pigs, rats, dogs and cats; 60,000 ppm for 2-3 months eliclited mild liver effects in rabbits; 5,000 ppm for 3 months caused no effects in dogs; 15,000 ppm for 4 months, produced no neuro-toxic effects in rats; 14,000 ppm for 10 months produced effects on the lungs, CNS, heart, liver, kidney, spleen of rats, mice and rabbits, while at 2,000 ppm no effects were reported in rats and mice. An increase in malignant tumors of the salivary glands was reported in male rats but not in female rats or mice of either sex after inhalation exposure to 50,000 ppm 5 hr/day, 5 day/wk for 21 months. Long Term inhalation of 5,000 ppm was not carcinogenic to rats and mice **Registration No:** 89 Moo 12, Soi Raikhing 42, Phutthamonthon Sai 5 Road Issue: Tambol Raikhing, Ampur Sampran, Nakhonpathom 73210 Thailand Revision Tel: +66 (0) 2105 0499 (Auto) Fax: +66 (0) 2105 0490

16. OTHER INFORMATION

The information given corresponds to the current state of our knowledge and experience of the product, and is not exhaustive. This applies to product that confirms to the specification, unless otherwise stated. In the case of combinations and mixtures one must make sure that no new dangers can arise. In any case, the user is not exempt from observing all legal, administrative and regulatory procedures relating to the product, personal hygiene, and protection of human welfare and environment.
